1. INACTIVE STATUS

A: Justification: The Aviation program is moving to accreditation status. The management specialization will not be able to be accredited without reducing or eliminating the flight training portion of the current specialization and creating multiple new classes in aviation management and business. The specialization currently has low enrollment and will have difficulty meeting the 7/10 rule with any new classes. Projections show that this specialization will not produce the minimum number of graduates to be viable in the future.

B. If there are current students, what are the implications?
All current students can transfer into the Aviation Education specialization. Most students are in the process.

C. Academic year and term Inactive Status effective: Fall 2014
Students cannot be admitted to a program after the effective date for inactive status. If the university does not request activation of an inactive program within 5 years of being placed on inactive status, the program is automatically terminated.
