Subject: EXCH 398

Greetings from Brookings!

I am working on a curriculum request for EXCH 398. We noticed that this course does not currently have a course description and wanted to confer with you all on it.

Would the following change in description work for the interested parties at NSU?

Qualified students enroll in an exchange with a NSE member school to enhance and expand their academic horizons and meet personal needs and interests. Students attend courses for a semester or a year, choosing classes that complement or supplement their majors at their home institution.

Thank you for your time and any suggestions you might have on this description.
