Missouri River Energy Services (MRES) is seeking a student in the Electrical Engineering program for a full-time summer internship in our Transmission department located in our corporate office in Sioux Falls, SD. The position begins in mid-May and goes through mid-August.

In this position you will be working on a variety of transmission related activities ranging from preparation of interconnection agreements, studies, power factor analysis, integration of activities related to forecasting of transmission expenses, refinement of transmission rating activities, and improving tools for screening transmission study results.

Working conditions will include office and some field work which could include light lifting, infrequent climbing, and occasional exposure to temperature and noise.

Qualifications:
- Proficiency with Microsoft Office - Word, Excel and Access
- Excellent verbal and written communication skills
- Desire to pursue a career in the energy industry
- Must at least be in your sophomore or junior year

Please send your resume and a cover letter explaining your qualifications hr@mrenergy.com.

Deadline for applying is January 29, 2016.
