BENNETT
Undergraduate EE
Summer 2016 Research Fellowship

Who: Electrical Engineering students entering their sophomore, junior, or senior year are eligible.

What:
Jack R. and Betty M. Bennett Undergraduate Research Award(s)

How Much: Between $2,500-$5,000 per award

How to apply:
Work with an EE Faculty member and write a brief proposal (1-3 pages) describing a research project you would like to undertake. The proposal should include a problem statement, description of the approach to solve the problem, resources required, timeline, anticipated results, significance of the project, matching/support funds (optional), and overall budget. Timeframe of the project is during the summer, but could continue into the upcoming fall/spring academic year. Students should submit their proposal, with your faculty advisor’s signature to the Electrical Engineering and Computer Science Department Head on or before March 15th.
