## 7. Explanation of the Change:

The Department of Chemistry and Biochemistry has decided to go back to a more traditional way of offering the general chemistry and organic chemistry sequences. This more closely aligns with other programs nationwide, as well as simplifying the program for students and all support staff who are trying to help students. The proposed changes involve existing courses and will not require any additional instructional support. The current second semester of general chemistry CHEM 236 Equilibrium and Energetics of Molecular Systems (3 cr.) will be replaced by CHEM 114-114L General Chemistry II \& Lab $(3,1)$.
