YOUR PHARMACIST KNOWS:

ADHERENCE TOOLS

There are a variety of tools to help you take the right medication at the right time. Your pharmacist can help you get started.

MEDICATION THERAPY MANAGEMENT

Pharmacists can provide a range of services to help decrease doctor visits and improve your health.

IMMUNIZATIONS

Pharmacists can determine which immunizations are recommended for you and can also administer most recommended immunizations in the pharmacy or clinic.

PATIENT CARE AND EDUCATION

Pharmacists provide you with education for certain diseases, such as diabetes and cardiovascular disease, to help you better understand your health conditions.

COST-LOWERING MEASURES

Pharmacists can help you get the best value from your medications and might be able to help reduce overall healthcare costs.
