Section 1. Course Title and Description

Prefix & No.	Course Title	Credits
OM 363	Introduction to Supply Chain Management	3

Course Description

The course covers fundamentals of Supply Chain Management including supply chain configuration and network, effective and efficient management of material flow from raw materials to final consumer, supply chain success drivers and metrics, and relationships between key links of a supply chain. The course discusses how to achieve strategic fit in delivering value to customers through alignment of procurement, manufacturing, logistics, and distribution functions.

Pre-requisites or Co-requisites

Prefix & No.	Course Title	Pre-Req/Co-Req?
None		

Registration Restrictions

None

Section 2. Review of Course

2.1. Will this be a unique or common course?

Unique Course

Prefix & No.	Course Title	Credits
OM 463	Supply Chain Management	3
DSCI 427	Supply Chain Management	3
IENG 455	Supply Chain Management and Logistics	3

Provide explanation of differences between proposed course and existing system catalog courses below:

The main difference between this course and existing system catalog courses is that it is designed for a broad audience and covers basic principles and fundamentals of supply chain management rather than the advanced content in the existing courses. In addition, the existing courses are inaccessible to engineering and general business students (i.e., non-Operations Management majors) because of the level of prerequisites on each course. The proposed course, OM 363 Introduction to Supply Chain Management, will allow students to gain an essential baseline knowledge and understanding of supply chain management.

Section 3. Other Course Information

3.1. Are there instructional staffing impacts?

No. Schedule Management, explain below: Course will be offered in rotation with other available courses.

3.2. Existing program(s) in which course will be offered: Management Minor, Business Economics

(B.A., B.S.), and Entrepreneurial Studies (B.A., B.S.)

3.3. Proposed instructional method by university (as defined by AAC Guideline 5.4): R – Lecture

3.4. Proposed delivery method by university (as defined by AAC Guideline 5.5): S01 - Face to Face; S15 - Online asynchronous; S18 - Online synchronous

3.5. Term change will be effective: Fall 2024

3.6. Can students repeat the course for additional credit? Yes, total credit limit: No

3.7. Will grade for this course be limited to S/U (pass/fail)? Yes No

3.8. Will section enrollment be capped? Yes, max per section: 40 No

3.9. Will this course equate (i.e., be considered the same course for degree completion) with any other unique or common courses in the common course system database in Colleague and the Course Inventory Report? Yes No

3.10. Is this prefix approved for your university? Yes No

Section 4. Department and Course Codes (Completed by University Academic Affairs)

4.1. University Department: Ness School of Management and Economics

4.2. Banner Department Code: SSME

4.3. Proposed CIP Code: 52.0203

Is this a new CIP code for the university? Yes No

1. Provide specific reasons for the proposal of this course and explain how the changes enhance the curriculum.

The existing supply chain management course, OM 463, is offered at an in-depth level required for the Operations Management students. However, it is inaccessible to general business (i.e., non-Operations Management majors) or engineering students because of the level of prerequisites on the course. OM 363 Introduction to Supply Chain Management will provide foundational skills needed in today's business environment. This will fill in a gap in an essential area of management expertise for students pursuing the Management Minor.

2. Note whether this course is: Required Elective

This course will be offered as an elective in the Management minor. Students in Business Economics and Entrepreneurial Studies majors will be able to complete this as an upper-division elective.

3. In addition to the major/program in which this course is offered, what other majors/programs will be affected by this course?

The course will also greatly enhance the skill set of other Ness School students majoring in Agricultural Business, Economics, and Economics - Agricultural Economics specialization, as well as students in the Jerome J. Lohr College of Engineering, such as Agricultural and Biosystems Engineering, Civil Engineering, Electrical Engineering, and Mechanical Engineering.

4. If this will be a dual listed course, indicate how the distinction between the two levels will be made.
N/A

5. Desired section size 40

6. Provide qualifications of faculty who will teach this course. List name(s), rank(s), and degree(s).
Ekatarina Korymoslova, Associate Professor; Ph.D.

7. Note whether adequate facilities are available and list any special equipment needed for the course.

Facilities are adequate. No special equipment needed.

8. Note whether adequate library and media support are available for the course.

Adequate library and media support are available.

9. Will the new course duplicate courses currently being offered on this campus? Yes No

10. If this course may be offered for variable credit, explain how the amount of credit at each offering is to be determined.

N/A
