32ND ANNUAL BULL SALE

Friday, April 12th, 2024 · 1:00 pm · SDSU CCERF · Brookings, SD

Greetings,

We are excited to invite you to the 32nd annual SDSU Bull Sale and we couldn't be more excited about the bulls we have to offer. It is one of the largest offerings we have ever had. There are plenty of good ones to go around. As usual, the bulls will be on display at approximately 10 am prior to the sale and we will have lunch available (and the SDSU ice cream is back) starting at approximately 11:30 am. You are also welcome to stop by and see the bulls prior to the sale.

A special thanks goes out to Kevin Vander Wal and his crew at the Cow-Calf Education and Research Facility. We are extremely appreciative of the tireless hours that these individuals have dedicated to our purebred cow herd. This sale, in addition to many other student activities, would not be possible without Kevin's commitment to our program.

Should you have questions pertaining to the bulls or the sale, please feel free to contact a member of the Seedstock Merchandising Class, Kevin Vander Wal (605-693-2253), or Dr. Cody Wright (605-688-5448).

2024 Seedstock Merchandising Class Members: Mitchell Bass, Grace Britton, Hannah Flogstad, Derrick Goldammer, Cheyenne Hulstein, Phil Jorgensen, Mitchell Kaul, Grace Klumper, Ann Pugh, Noah Randall, Annie Reinke, Kallista Roers, Bridget Weese, and Ethan Wright

SALE DAY PHONE NUMBER: (605) 693-2253

LOCATION

The SDSU Cow-Calf Education and Research Facility is located northwest of campus at 2901 Western Ave. From I-29 exit 133, go west 2.3 miles on the Hwy 14 Bypass. Continue west on the Hwy 14 Bypass past Medary Avenue (4-way stoplight) to Western Avenue. Go north 3/4 miles on Western Avenue. There will be signs marking the entrance to the bull sale.

HOW THE LIMITED AUCTION WORKS

The bulls will be on display beginning at 10 am on Friday, April 12th. Prospective buyers should complete a bidder card and list the bulls they would like to bid on. Bidder cards must be turned into the registration table by 1:00 pm. The sale will begin with the bulls that have the greatest number of bidders interested in them, regardless of breed. For the bulls with more than one interested bidder, a limited auction will be held. Bids will begin with the minimum bid and increase incrementally. Once a bidder declines a bid, they are out of the limited auction. The auction will continue until only one bidder remains. In the event that only one bidder is interested in a given bull, they will have the opportunity to claim that bull for the minimum bid. Bidders are encouraged to list more bulls than they intend to purchase on their bidder card. Listing a bull on the bidder card does not oblige a bidder to purchase a bull, it only ensures they will have the opportunity to participate in the limited auction. Bulls not sold during the limited auction will be for sale at the minimum bid on a first come, first served basis. *SDSU retains the right to in-herd semen use at our expense and the buyer's convenience.*

TERMS AND CONDITIONS

All bulls will be sold under the suggested sale terms and conditions from the American Simmental Association.

VOLUME DISCOUNT

Buyers purchasing 2 or more bulls, paid by the same check, and transferred to the same name will receive a 10% discount from their purchase price.

FREE DELIVERY

SDSU will offer free delivery of bulls within 200 miles of Brookings, SD. We will also deliver bulls to our Cottonwood Research Station, near Philip, SD, for pick up. Delivery of bulls will be scheduled in late April and early May. If buyers pick up their bulls in Brookings, SD, prior to June 1, they will receive a \$100 discount per head.

BULL HEALTH AND MANAGEMENT

- Pre-Wean - Bovi-Shield Gold One Shot and Wart Shield
- September 12 - Bovi-Shield Gold One Shot, Wart Shield, and Ultrabac 7 Somubac
- November 3 - Ultrabos pour-on
- February 20 - Stay-bred VL5, Ultrabos pour-on
- April 9 - Semen evaluation
- The bulls did not receive any creep feed prior to weaning. The bulls were started on a dried distillers grains plus solubles and soybean hull supplement one week after weaning and remained on pasture until October 6 when they were moved to the monoslope building. They were then placed on a 0.53 Mcal/lb, 14.5% crude protein, corn silage-based diet for development.

GENOMIC TESTING

Each of the bulls in the 2024 SDSU Bull Sale has undergone genomic testing through the American Angus Association (i50K by Zoetis) and American Simmental Association (GGP-LD by Neogen). The data collected from this testing is used by the associations to generate genomically-enhanced EPDs. Genomically-enhanced EPDs are used the same way as traditional EPDs; however, the accuracy is far better. Inclusion of genomic data in the analyses increases the accuracy of the EPDs to a similar level to what the bulls would have after they have sired several calves. **All of the SimAngus bulls are homozygous black and are free of known genetic abnormalities. All Angus bulls are free of known genetic abnormalities except for 329 who is a DD carrier.**

Balance is a common theme in these Stone Cold sons. Its hard to find a spot this bull lacks in. He'll make calving season a breeze and put both growth and some look in your calves. If you're keeping heifers back, they're going to be easy calving, heavy milking, and as gentle as can be.
