This could include discredited or controversial ideas, because understanding the weaknesses of failed ideas is as important as understanding the strengths of successful ones. Students should be prepared to identify the good and bad in new or controversial areas of thought. Topics may be difficult, not only intellectually but emotionally; however, these discussions are essential to meeting the course’s student learning outcomes and assisting students in developing problem-solving and critical thinking skills. During all conversations, respect for diverse viewpoints is of utmost importance. Students are free to take reasoned exception to the views offered in the course and to reserve judgment about matters of opinion, but they are responsible for learning the content of the course. While the exploration of controversial topics may be an important component of meeting the student learning outcomes in this course, no student will be compelled or directed to personally affirm, adopt, or adhere to any of the divisive concepts.
