Research

The Fishback Center for Early Childhood Education welcomes university researchers to see the laboratory school as an unique opportunity for learning and discovery and to see it as a place of research. Research investigators may use our site to conduct studies, either independently or in collaboration with core or affiliate center faculty. For more information, reference the Fishback Center Research Policy.

For copies of recent publications, please visit the center’s research bulletin board in the main hallway between the kindergarten and preschool classrooms.

Recent Center-based Presentations:

Bowne, M., Cutler, K., & Bersani, C. (2010). *Professional development among three laboratory schools.* National Association for the Education of Young Children Annual Conference: Anaheim, CA
